

# National Poll Toplines

## Methodology

**Poll number:** pr2006

**Interview Dates:** June 6-11, 2020

**Sample Population:** 9087 registered voters in the United States.

**Sample Selection:** Scientific online poll - stratified sample of panel respondents.

**Weighting Parameters:** The sample was weighted based on the U.S. Census Bureau's Voting and Registration Supplement to the Current Population Survey for registered voters in the United States based on age, gender, race, educational attainment, census region, and Hispanic ethnicity.

This topline provides weighted percentages, as well as the unweighted N-size for the total sample. Due to the effects of weighting and rounding, figures may or may not add up to 100%. The standard deviation of the weights was: 0.220957. The maximum weight was: 1.7111119. The minimum weight was: 0.3274061. 95% of the weights were between 0.4041978, 1.3730702.

**Margin of Error:** The 95% credibility interval for this survey is +/- 1%, which includes the square root of the design effect (DEFT): 1.0241175.

Q24...States are facing budget deficits due to expenses related to the coronavirus and decreased revenues from the economic fallout of the pandemic. Congress is considering providing \$1 trillion in federal aid to states and local governments to avoid raising taxes and/or making deep cuts to government programs and services, including public schools, emergency medical services, and preparedness for natural disasters. Some members of Congress say that the federal government has a responsibility to support state and local governments during this crisis. Others say that states are responsible for balancing their budgets despite the pandemic and should not rely on the federal government for aid. What do you think? Do you support or oppose federal aid to state and local governments?
