Methodology

Poll number: pr2117

Interview Dates: June 11 - June 15, 2021

Sample Population: 1525 registered voters in the United States.

Sample Selection: Scientific online poll - stratified sample of panel respondents.

Weighting Parameters: The sample was weighted based on the U.S. Census Bureau's Voting and Registration Supplement to the Current Population Survey for registered voters in the United States based on age, gender, race, educational attainment, census region, and Hispanic ethnicity. The sample was also balanced by reported 2020 presidential vote.

This topline provides weighted percentages, as well as the unweighted N-size for the total sample. Due to the effects of weighting and rounding, figures may or may not add up to 100%. The standard deviation of the weights was: 0.263957. The maximum weight was: 2.5960043. The minimum weight was: 0.3556114. 95% of the weights were between 0.6265233, 1.6364949.

Margin of Error: The 95% credibility interval for this survey is +/- 2.6%, which includes the square root of the design effect (DEFT): 1.034228.

Respondent Language Options: In order to properly capture a representative sample, Climate Nexus provides survey respondents with the option to take the survey in English or Spanish and actively recruits respondents whose primary language is Spanish based on Census proportions. Climate Nexus uses professional survey translators to account for cultural differences and capture nuances between translations. All data is reported in English.

ST22... As you may know, the filibuster is a procedure used in the U.S. Senate to block a bill from being put to a vote until a supermajority of 60 senators agree to end debate on it. Some say the Senate should keep the filibuster because the filibuster can promote compromise and ensure that one party can't single-handedly advance legislation. Others say the Senate should eliminate the filibuster because it enables the minority party to block legislation that a majority of senators, and often a majority of Americans, support. What do you think? Should the Senate keep or eliminate the filibuster?

ST11...As you may know, there's a debate going on in the federal government about whether to build new natural gas pipelines and facilities to store and export gas to allow gas companies to sell more gas overseas. Supporters of building new natural gas pipelines and facilities say exporting more natural gas will create good-paying jobs here in the United States. Opponents of building new natural gas pipelines and facilities say exporting more natural gas will accelerate climate change and pollute air and water in the United States. National Poll Results

Methodology

Poll number: pr2117

Interview Dates: June 11 - June 15, 2021

Sample Population: 1525 registered voters in the United States.

Sample Selection: Scientific online poll - stratified sample of panel respondents.

Weighting Parameters: The sample was weighted based on the U.S. Census Bureau's Voting and Registration Supplement to the Current Population Survey for registered voters in the United States based on age, gender, race, educational attainment, census region, and Hispanic ethnicity. The sample was also balanced by reported 2020 presidential vote.

These cross tabulations provide weighted percentages, as well as the unweighted N-sizes for the total sample and subsamples. Due to the effects of weighting and rounding, figures may or may not add up to 100%. The standard deviation of the weights was: 0.263957. The maximum weight was: 2.5960043. The minimum weight was: 0.3556114. 95% of the weights were between 0.6265233, 1.6364949.

Margin of Error: The 95% credibility interval for this survey is +/- 2.6%, which includes the square root of the design effect (DEFT): 1.034228.

Respondent Language Options: In order to properly capture a representative sample, Climate Nexus provides survey respondents with the option to take the survey in English or Spanish and actively recruits respondents whose primary language is Spanish based on Census proportions. Climate Nexus uses professional survey translators to account for cultural differences and capture nuances between translations. All data is reported in English.

ST22...As you may know, the filibuster is a procedure used in the U.S. Senate to block a bill from being put to a vote until a supermajority of 60 senators agree to end debate on it. Some say the Senate should keep the filibuster because the filibuster can promote compromise and ensure that one party can't single-handedly advance legislation. Others say the Senate should eliminate the filibuster because it enables the minority party to block legislation that a majority of senators, and often a majority of Americans, support. What do you think? Should the Senate keep or eliminate the filibuster?
