

# National Poll Toplines

## Methodology

**Poll number:** [pr1922](#)

**Interview Dates:** August 20-22, 2019

**Sample Population:** 2208 registered voters in the United States.

**Sample Selection:** Scientific online poll - stratified sample of panel respondents.

**Weighting Parameters:** The sample was weighted based on the U.S. Census Bureau's Voting and Registration Supplement to the Current Population Survey for registered voters in the United States based on age, gender, race, educational attainment, census region, and Hispanic ethnicity.

Figures may or may not sum to 100% and this is due to the effects of rounding and weighting. The standard deviation of the weights was: 0.1774743. The maximum weight was: 1.7742533. The minimum weight was: 0.4336866. 95% of the weights were between 0.5456033, 1.5345824.

**Margin of Error:** The 95% credibility interval for this survey is +/- 2.1%, which includes the square root of the design effect (DEFT): 1.0156194.

Q12...Below are two statements about how government action to address climate change will impact the economy and jobs. Which comes closest to your view?

Response	Percent	Weighted N	N
If the government takes action to address climate change, the private sector will be encouraged to innovate and transition away from fossil fuels to clean alternatives. In the process, the United States will expand its clean energy economy, create high-paying jobs, and put itself in a stronger position to compete in a world economy that is rapidly moving to renewable energy and zero-emission vehicles.	67%	1,488	1,486
If the government takes action to address climate change, the private sector will be forced to comply with burdensome regulations that will raise energy prices. In the process, the United States will suffer slower economic growth, lose good jobs in a variety of industries that depend on cheap fossil fuels, and sacrifice its competitive advantage as one of the world's leading producers of oil, gas, and coal.	33%	720	722

# National Poll Results

## Methodology

**Poll number:** pr1922

**Interview Dates:** August 20-22, 2019

**Sample Population:** 2208 registered voters in the United States.

**Sample Selection:** Scientific online poll - stratified sample of panel respondents.

**Weighting Parameters:** The sample was weighted based on the U.S. Census Bureau's Voting and Registration Supplement to the Current Population Survey for registered voters in the United States based on age, gender, race, educational attainment, census region, and Hispanic ethnicity.

Figures may or may not sum to 100% and this is due to the effects of rounding and weighting. The standard deviation of the weights was: 0.1774743. The maximum weight was: 1.7742533. The minimum weight was: 0.4336866. 95% of the weights were between 0.5456033, 1.5345824. For cross tabulations, each reported N-size is the weighted N-size. Each stratum's N-size may or may not add up to the total N-size for any one specific question, this is due to the effects of rounding and weighting.

**Margin of Error:** The 95% credibility interval for this survey is +/- 2.1%, which includes the square root of the design effect (DEFT): 1.0156194.
