About the same	54%	605	605
Worse	36%	405	406

OH5…Right now, which of the following do you think should be the most important priority for addressing Ohio's energy needs?

Response	Percent	Weighted N	N
Building more natural gas power plants	13%	139	137
Building more nuclear power plants	7%	83	84
Developing more renewable energy sources, such as wind and solar	63%	701	701
Not sure	17%	189	190

OH6…As you may know, the state of Ohio recently passed new legislation that keeps two nuclear power plants and two coal plants running. The cost of maintaining these nuclear and coal plants would be paid by consumers through a monthly surcharge to their electricity bills. Additionally, in the next decade, the law eliminates the state's requirement that utilities increase the amount of renewable energy, such as wind and solar, they produce.Based on what you know, do you support or oppose this legislation?

Response	Percent	Weighted N	N
Strongly support	7%	82	83
Somewhat support	24%	265	264
Somewhat oppose	24%	263	261
Strongly oppose	30%	331	334
Not sure	15%	172	170

OH7…As you may know, the state of Ohio passed a wind setback law in 2014, which regulates where wind turbines can be located. It nearly tripled the distance that wind turbines must be set back from the nearest property line to about a quarter-mile. As a result, fewer wind turbines have been built in Ohio than in neighboring states including Indiana, Michigan, and Illinois.Which of the following comes closest to your own view, even if neither is exactly right?

Response	Percent	Weighted N	N
Ohio should eliminate this wind setback law. The wind setback law has cost Ohio billions of dollars in new investment, limited job growth, and kept our state reliant on dirtier sources of energy. Ohio's wind setback law is also bad for farmers and other rural landowners who want to generate revenue from placing wind turbines on their land.	68%	761	759
Ohio should retain this wind setback law. Wind turbines are unattractive and noisy, and they may negatively impact nearby property values. Ohio's wind setback law is needed to protect farmers and rural landowners who don't want to have to live near wind turbines.	32%	351	353

OH8…As you may know, individuals that purchase or lease an electric vehicle can receive a federal tax credit of up to $7,500. However, this credit is only available for the first 200,000 electric vehicles sold by each manufacturer.Given what you know about the electric vehicle tax credit, do you agree or disagree with the following statement:The federal tax credit for electric vehicles should extend beyond each manufacturer's first 200,000 vehicles.

Response	Percent	Weighted N	N
Strongly agree	36%	403	408
Somewhat agree	27%	306	306
Somewhat disagree	11%	125	122
Strongly disagree	9%	103	104
Not sure	16%	175	172

OH9…Highway construction and maintenance is funded in part through taxes on gasoline, in addition to the sales tax and other funds that all residents pay into. Many state legislatures are considering bills that would place new or higher annual fees on electric vehicles because owners of electric vehicles do not purchase gasoline for their vehicles. In Ohio, the average driver of a passenger vehicle pays about $124 per year in taxes on the gas they buy. Ohio currently requires a $200 annual fee for drivers of electric vehicles.Which of the following statements about electric vehicles comes closest to your view, even if none are exactly right?

Response	Percent	Weighted N	N
Owners of electric vehicles should not have to pay annual electric vehicle fees.	29%	322	318
Owners of electric vehicles should pay an annual fee equivalent to what an owner of a gas-powered vehicle pays in gas taxes each year.	60%	672	678
Owners of electric vehicles should pay an annual fee higher than what an owner of a gas-powered vehicle pays in gas taxes each year.	11%	118	116

OH10A…Do you consider natural gas to be a form of clean energy, or not? [RANDOM HALF SAMPLE A/B SPLIT]

Not sure	40%	206	207

OH11…Generally speaking, which do you think is more likely to produce a greater number of good jobs for Ohioans?

Response	Percent	Weighted N	N
Increasing domestic production of fossil fuels such as oil and gas	28%	312	313
Increasing domestic production of renewable energy such as wind and solar	53%	592	589
Not sure	18%	204	206

OH12…Below are a few statements about natural gas. Which of the following comes closest to your own view, even if none are exactly right?

Response	Percent	Weighted N	N
America's long-term goal should be to transition to renewable energy, but natural gas is a transition fuel that we will still need for a while. We should use natural gas until renewable energy, including wind and solar, becomes more affordable for the average American.	55%	616	618
The United States should ban hydraulic fracturing or 'fracking' of natural gas. Carbon dioxide and methane emissions from natural gas contribute to climate change, and we must act soon if we are going to leave this planet healthy and habitable for ourselves and our children.	19%	207	207
The United States should embrace natural gas as an important fuel for producing electricity. It can and should power American homes for decades to come because it is abundant, cheap, and clean.	26%	289	287

OH13…Do you support or oppose requiring electric utility companies in the state of Ohio to generate 100% of their electricity from renewable sources, like wind and solar, by the year 2050?

Ohio Poll Results

Methodology

Poll number: pr1923

Interview Dates: October 1-7, 2019

Sample Population: 1112 registered voters in Ohio.

Sample Selection: Scientific online poll - stratified sample of panel respondents.

Weighting Parameters: The sample was weighted based on the U.S. Census Bureau's Voting and Registration Supplement to the Current Population Survey for registered voters in Ohio based on age, gender, race, and educational attainment.

Figures may or may not sum to 100% and this is due to the effects of rounding and weighting. The standard deviation of the weights was: 0.1236733. The maximum weight was: 1.3348724. The minimum weight was: 0.6246466. 95% of the weights were between 0.7978708, 1.222228.

Margin of Error: The 95% credibility interval for this survey is +/- 2.9%, which includes the square root of the design effect (DEFT): 1.0076117.

OH6…As you may know, the state of Ohio recently passed new legislation that keeps two nuclear power plants and two coal plants running. The cost of maintaining these nuclear and coal plants would be paid by consumers through a monthly surcharge to their electricity bills. Additionally, in the next decade, the law eliminates the state's requirement that utilities increase the amount of renewable energy, such as wind and solar, they produce. Based on what you know, do you support or oppose this legislation?

OH7…As you may know, the state of Ohio passed a wind setback law in 2014, which regulates where wind turbines can be located. It nearly tripled the distance that wind turbines must be set back from the nearest property line to about a quarter-mile. As a result, fewer wind turbines have been built in Ohio than in neighboring states including Indiana, Michigan, and Illinois. Which of the following comes closest to your own view, even if neither is exactly right?

idvars	Ohio should eliminate this wind setback law. The wind setback law has cost Ohio billions of dollars in new investment, limited job growth, and kept our state reliant on dirtier sources of energy. Ohio's wind setback law is also bad for farmers and other rural landowners who want to generate revenue from placing wind turbines on their land.	Ohio should retain this wind setback law. Wind turbines are unattractive and noisy, and they may negatively impact nearby property values. Ohio's wind setback law is needed to protect farmers and rural landowners who don't want to have to live near wind turbines.	Weighted N
